Client Project Reflection Paper

Why Was It Chosen?

I wanted to help someone that was staring an organization. When I first heard about it I just knew instantly that I would love to help. When I heard that my Bio teacher was founding a organization that helps with others mental health it just knew it was for me.

What Are Some Issues You Have Faced?

When I came to executing the idea. My client told me what to make and it was a little difficult to make it. But after I came up with a great idea it made the process all the easier. When it comes to making these projects it important to have fun with it.

How Does This Fit In With ADM Development?

This helps develop a students social skills. As well improve their skills in the various programs. It a good exercise to help the student use their knowledge to make a great product. This can be helpful later on when they are required to work together in the future.

What Would You Do Differently?

I would take many more notes. And check in as I was making to make sure this is what my client wanted. At the end I would compare all of the parts as they were being developed.

Instead of thinking of it as work.I should have thought of it like a fun job that someone gave to me.

What Did You Learn From The Project?

That feedback is very important. You have to have fun with it in order to make a great project. It's like the old saying "*if you love your job, you'll never work a day in your life.*" The last thing I learned it that it takes a lot of creativity to make it.

Anything Else To Add?

When it comes to work it all depends on your mindset. Sometimes we feel like we can't get any work done. This could be because your mind could be in a negative place. Sometimes it's important to have a clear goal in mind.
